## SS 1 Check Docker

```
PES1UG23AM309@h:~$ docker run hello-world
Unable to find image 'hello-world:latest' locally
latest: Pulling from library/hello-world
17eec7bbc9d7: Pull complete
Digest: sha256:05813aedc15fb7b4d732e1be879d3252c1c9c25d885824f6295cab4538cb
85cd
Status: Downloaded newer image for hello-world:latest

Hello from Docker!
This message shows that your installation appears to be working correctly.

To generate this message, Docker took the following steps:
 1. The Docker client contacted the Docker daemon.
 2. The Docker daemon pulled the "hello-world" image from the Docker Hub.
    (amd64)
 3. The Docker daemon created a new container from that image which runs th
e
    executable that produces the output you are currently reading.
 4. The Docker daemon streamed that output to the Docker client, which sent
it
    to your terminal.

To try something more ambitious, you can run an Ubuntu container with:
$ docker run -it ubuntu bash

Share images, automate workflows, and more with a free Docker ID:
https://hub.docker.com/

For more examples and ideas, visit:
https://docs.docker.com/get-started/
PES1UG23AM309@h:~$ |
```

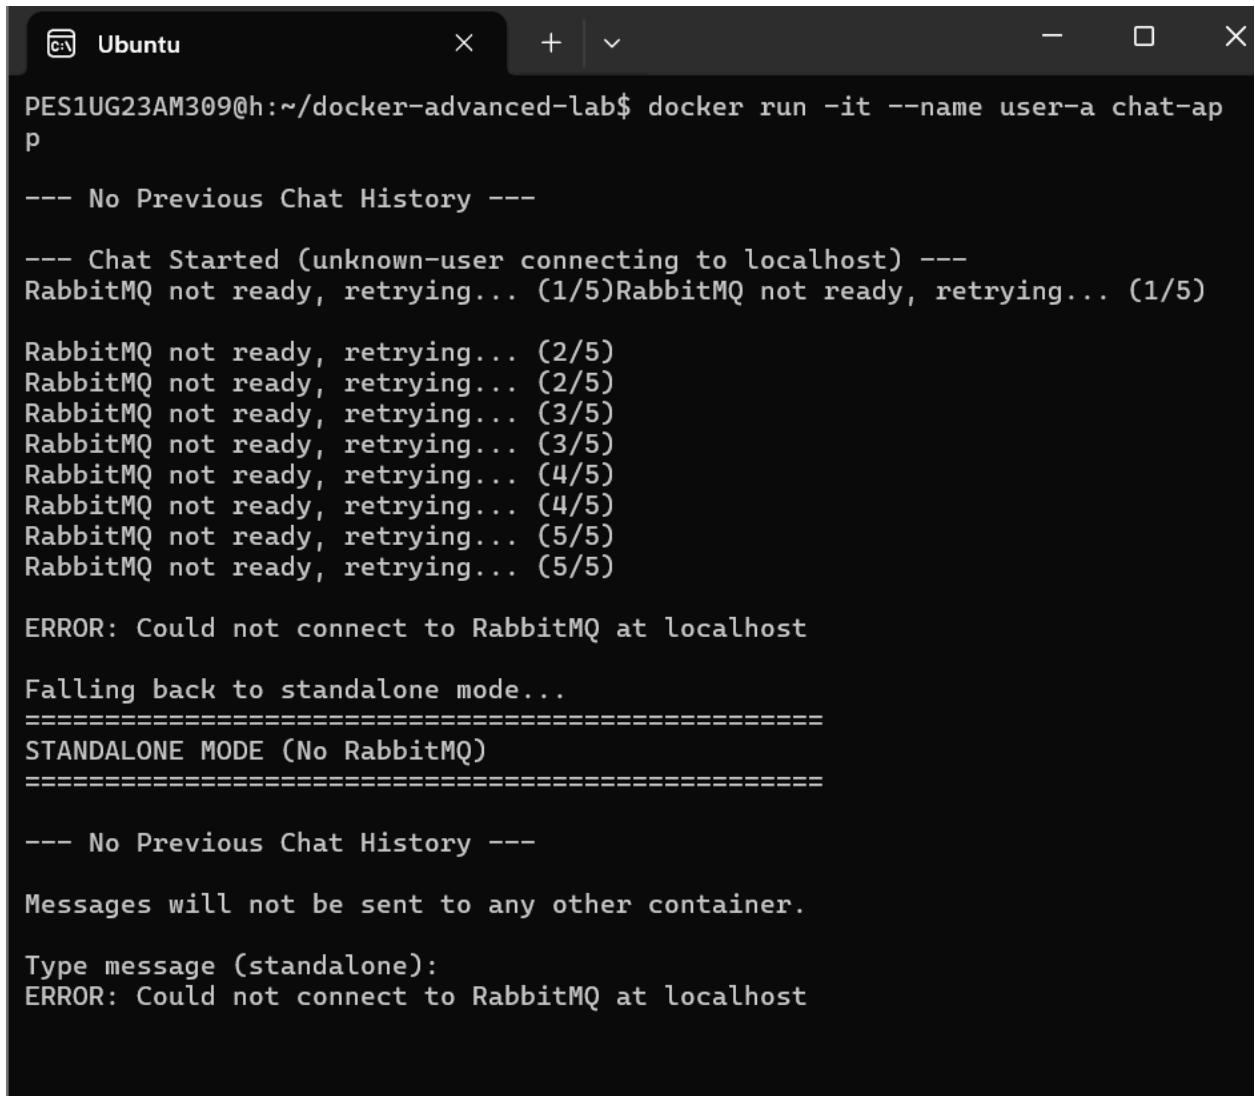

## SS 2 Docker Compose check

```
PES1UG23AM309@h:~$ docker-compose --version
docker-compose version 1.29.2, build unknown
PES1UG23AM309@h:~$
```

### SS-3 Copy project files

```
PES1UG23AM309@h:~/docker-advanced-lab$ ls
Dockerfile           chat.py:Zone.Identifier
Dockerfile:Zone.Identifier docker-compose.yml
chat.py              docker-compose.yml:Zone.Identifier
PES1UG23AM309@h:~/docker-advanced-lab$
```

### SS-4 Run RabbitMQ

The screenshot shows a terminal window titled "Ubuntu". The terminal output is as follows:

```
PES1UG23AM309@h:~/docker-advanced-lab$ docker run -it --name user-a chat-ap
p
--- No Previous Chat History ---

```

## SS-6 Docker Network

A screenshot of a terminal window titled 'Ubuntu'. The window shows a command-line session for running a Docker container named 'user-b' with specific network and environment configurations. The container starts a 'chat-app' which initiates a chat session with another user. The session includes messages like 'hi sneha!' and 'hi hi swathi!'. The terminal has a standard Linux-style header with icons for window control and a title bar.

```
PES1UG23AM309@h:~$ docker run -it --name user-b \
--network chat-net \
-e RABBIT_HOST=rabbitmq \
-e QUEUE_NAME=queue_b \
-e TARGET_QUEUE=queue_a \
chat-app

--- No Previous Chat History ---

--- Chat Started (unknown-user connecting to rabbitmq) ---
Type message: hi sneha!
Sent by unknown-user: hi sneha!
Type message:
Received from unknown-user: hi hi swathi!
Type message:
```

### SS-7 Docker Network

```
PES1UG23AM309@h:~$ docker run -it --name user-a \
--network chat-net \
-e RABBIT_HOST=rabbitmq \
-e QUEUE_NAME=queue_a \
-e TARGET_QUEUE=queue_b \
chat-app

--- No Previous Chat History ---

--- Chat Started (unknown-user connecting to rabbitmq) ---
Type message: hi
Received from unknown-user: hi sneha!
Type message: hi swathi!
Sent by unknown-user: hi hi swathi!
Type message:
```

### SS-8 Docker Compose

```
PES1UG23AM309@h:~$ cd docker-advanced-lab
PES1UG23AM309@h:~/docker-advanced-lab$ docker compose run --rm user-a
unknown flag: --rm

Usage: docker [OPTIONS] COMMAND [ARG...]

Run 'docker --help' for more information
PES1UG23AM309@h:~/docker-advanced-lab$
```

### SS-9 Docker Compose

```
PES1UG23AM309@h:~$ cd docker-advanced-lab
PES1UG23AM309@h:~/docker-advanced-lab$ docker compose run --rm user-a
unknown flag: --rm

Usage: docker [OPTIONS] COMMAND [ARG...]

Run 'docker --help' for more information
PES1UG23AM309@h:~/docker-advanced-lab$
```

### SS-10 Docker Compose

```
PES1UG23AM309@h:~$ cd docker-advanced-lab
PES1UG23AM309@h:~/docker-advanced-lab$ docker compose run --rm user-a
unknown flag: --rm

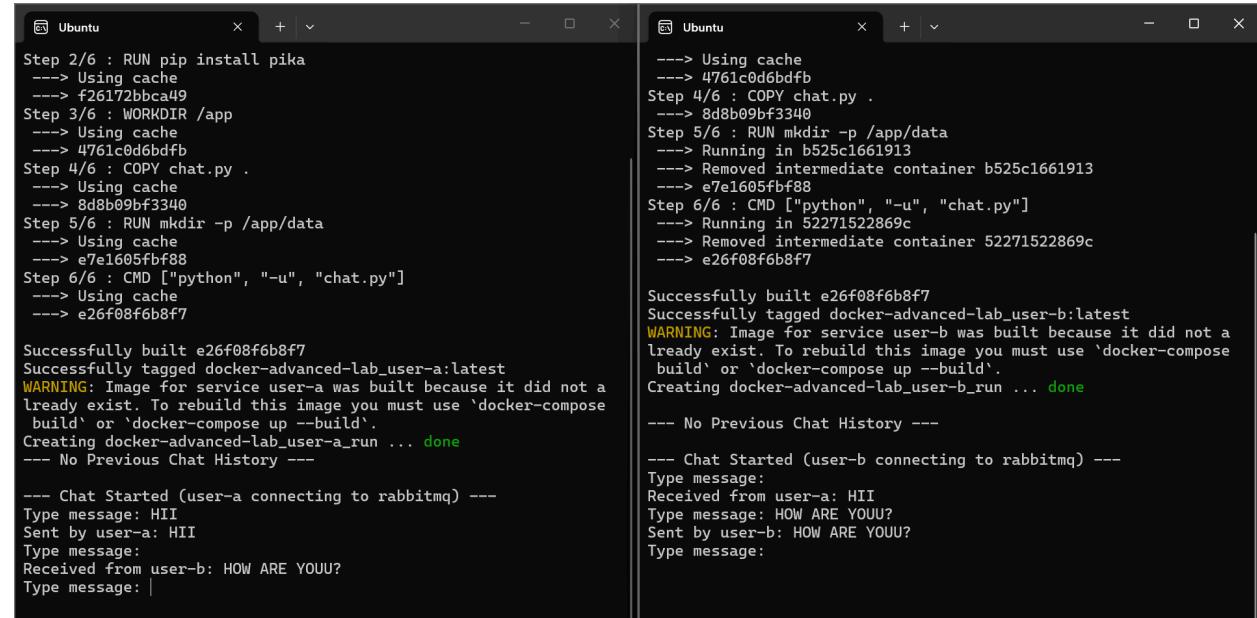

Usage: docker [OPTIONS] COMMAND [ARG...]

Run 'docker --help' for more information
PES1UG23AM309@h:~/docker-advanced-lab$
```
